Learning Checklist

You will find a checklist at the end of each lesson that will help you keep track of the skills you are working on: what you need help with, what you can do on your own, and what feels easy. Take a few moments to fill it out after you have finished your test for each lesson. You can also add notes to help your parent or teacher understand how to help you (or your parent might want to add notes in this space).

Please remember that these skills continue to develop over time so don't worry if you can't do all of them yet. The main goal is to be aware of which skills you need to focus on.

| SKILLS | Developing | Consistent | Competent | Notes |
|---|------------|------------|-----------|-------|
| Use carrying to add whole numbers with three or more digits | | | | |
| Translate word problems into numeric equations | | | | |
