Learning Checklist

You will find a checklist at the end of each test that will help you keep track of the skills you are working on: what you need help with, what you can do on your own, and what feels easy. Take a few moments to fill it out after you have finished your test for each lesson. You or your parent can also add notes about what you are working on or have questions about.

Please remember that these skills continue to develop over time so don’t worry if you can’t do all of them yet. The main goal is to be aware of which skills you need to focus on.
