# Algebra II Syllabus

### Textbook

Algebra II: An Incremental Development (Saxon)

### **Materials**

*Algebra II* textbook Homeschool Packet: Practice tests (formerly called Form A tests), answers to problem sets and practice tests

## **Schedule of Assignments**

As an independent study student, you can complete this course at your own pace. Some students benefit from doing every single problem in the problem sets while others prefer to do all the even numbered problems, and then go back and do the odd numbered problems for skills that need extra practice. By checking your answers after each problem set, you can gauge how well you are grasping the material and adjust your work load accordingly.

There is a proposed schedule of assignments on the back that will help you move through the course in 32 weeks. Feel free to adjust this schedule to suit your needs and learning style.

We wish you a challenging and successful year of Algebra II!
